Bullzi Security Releases New Security Assurance Package For Security and Compliance Programs

Lake Mary, FL, December 29, 2009 – Bullzi Security, Inc., a leader in providing converged security solutions released a special eLearning security package, to assist clients with their information security and compliance needs in one bundled package. The *WISE Security Assurance Package* features over 20 hours of security-related courseware specifically geared towards helping organizations prepare their employees and contractors to prevent, detect, and respond to security incidents, as well as meet today’s regulatory requirements. The current package includes courses on Security Awareness, PCI Awareness, Privacy Awareness, Information Security Management, Physical Security, Identity Theft, Red Flags Rule, H1N1 Pandemic Planning, Secure Coding Practices, Incident Response, Breach Notification and Computer Forensics.

Bullzi plans to further expand the *WISE Security Assurance Package* throughout 2010 by adding courses on System Hardening, Internet Safety, Business Continuity Planning, Workplace Violence, Loss Prevention & Retail Theft, Diversity/Discrimination/Harassment Training, Alcohol & Substance Abuse, How To Perform Vulnerability Assessments, and more. Clients that purchase the package by January 31, 2010, will receive discounted pricing and any of the 2010 Security Assurance Package courses free of charge as they are released.

Michael Welch, Bullzi’s Chief Operating Officer, says of the new program, “Many of our clients have not only a need, but an obligation to insure their employees, contractors, vendors, and other related parties are properly trained on dangers related to information security, as well as possibility facing compliance issues related to privacy protection and regulations such as NERC Reliability Standards CIP002-009, Red Flags Rules, and more. Rather than offering courses only on an individual level, it made sense to bundle our security courses to create one comprehensive suite of eLearning courses to answer all of these needs in one product.”

The WISE Security Assurance Package can also be enhanced with the addition of a daily vulnerability assessment scanning tool offered via Bullzi Security. This valuable tool will assess an organization's external security exposure on a daily basis by scanning a client's external network to seek out both network- and application-level vulnerabilities and is available for a nominal fee.

For additional information on the WISE Security Assurance Package, contact Michael Welch at (407) 312-5171 or mdwelch@bullzisecurity.com.
