Bullzi Security Releases Medicare Training Course

Altamonte Springs, Florida, October 12, 2010 – Bullzi Security Inc. (BLLZ.pk), a leading information security and education provider releases new Medicare Training course.

According to Michael Welch, co-founder and President of Bullzi Security, “After six months of development, Bullzi's education division, WISE Learning Solutions LLC (a wholly-owned subsidiary of Bullzi Security), completed a 3½ hour web-based, interactive Medicare training course. This on-line, multimedia course uses graphics, animations, interactions, and audio to educate users on all aspects of the Medicare program, including Medicare Parts A through D, coverage, costs, enrollment, coordination of benefits, supplemental coverage, long term care, etc.”

Mr. Welch went on to say, “The course was initially developed for the New Jersey Department of Health & Senior Services (DHSS) to educate volunteer SHIP (State Health Insurance Assistance Program) counselors on the Medicare program, so they, in turn, can provide assistance to new Medicare beneficiaries about their Medicare options. Bullzi's eLearning group worked with DHSS' subject matter experts to create the content and then assembled the course using WISE Learning Solutions' courseware authoring tool, CourseCreator™”.

Mr. Welch closed by saying, “Since the content for this course is based on a Federal program, Bullzi Security will be marketing this training program to each of the other 49 States. This new training program is the first in a series of non-security training programs that is being developed by WISE. By working with subject matter experts, WISE can develop education programs on any topic and build it's library of on-line training courses.”

Bullzi Security is Strong, Stable and Secure!
